Blackheads, papules and pustules, briefly referred to as rash eruptions, characterize blemished skin, which usually reveals enlarged pores. This is a frequent and often severe skin disorder which begins in puberty and can extend into adulthood. Horny material and excessive sebum form a medium in which certain germs flourish, leading to skin inflammation.

A tendency towards follicular hyperkeratosis, excessive sebum production and excessive bacterial infestation of the skin flora are regarded as the three causes which promote blemished skin. This is where care cosmetics can and should be sensibly applied.

The task of the care product series for oily, blemished skin is to normalize the oily-moist skin condition and to locally combat blemishes. This therefore combats the tendency to develop acne in its initial stages.

- **Optimally prepares the skin for subsequent care products**
- **Prevents inflammation, spots and blackheads**
- **Leaves the skin feeling clean, fresh and soft**
- **The skin's surplus oil, horny lamellae and particles of dirt are gently removed**

Clarifying Cleansing Gel

MILD CLEANSING GEL

People afflicted with blemished skin often suffer from a compulsion to wash their face frequently. Not infrequently, aggressive cleansing agents are used to do so. The other extreme are users of plain tap water. Both modes of behavior promote acne: aggressive drying out of the skin further exacerbates excessive hornification and therefore leads to the hardening of blackheads, whilst inadequate removal of the skin's surplus oil promotes the extent of bacterial infestation on the surface of the skin. This in turn promotes the occurrence of rash eruptions.

Particular sensitivity is therefore required to ensure that affected persons regard regular and gentle cleansing as indispensable and daily skin care.

Clarifying Cleansing Gel is a mild cleansing gel which enables gentle but nevertheless thorough cleansing.

Home care application

Gently distribute Clarifying Cleansing Gel over the skin on the face, neck and neckline with moist hands. Rinse off with plenty of water. Then treat with Purifying Tonic Lotion.

***Tip:** Once the skin is free of inflammation, a face brush is optimally suitable for distributing the cleansing gel.*

ACTIVE SUBSTANCES

- **Yeast extract:** Enriched with B group vitamins and allantoin, sebum-regulating
- **Decyl glucoside (sugar tenside):** Naturally-based raw active washing substance
- **Allantoin:** Supports the natural regeneration of the skin

JANSSEN COSMETICS

OILY SKIN

- **Alcohol-free**
- **Optimally prepares the skin for subsequent treatments**
- **Prevents inflammation and blackheads**
- **The skin is perceptibly revived and refreshed**
- **Excessive sebum production is normalized**

☰ Purifying Tonic Lotion

SEBUM FLOW-REGULATING TONIC

Thorough, pore-deep cleansing is only completed when the cleansing preparation is followed by a facial tonic. The facial tonic, briefly referred to as a tonic, thus becomes an indispensable addition to skin type-friendly and thorough cleansing.

Both undesired tap water residues and any cleansing product residues are removed from the skin. With its refreshing and reviving function, the tonic restores the skin's equilibrium, enhancing the effect of subsequent care preparations and the skin's individual well-being.

Purifying Tonic Lotion is a mild, alcohol-free facial tonic with a skin-friendly pH value specifically for all oily, blemished skin profiles which have a tendency to develop acne.

Home care application

Pour Purifying Tonic Lotion onto a cotton wool pad and stroke gently over the face and neck. Apply each time after cleansing with Clarifying Cleansing Gel.

ACTIVE SUBSTANCES

- **Yeast extract:** Enriched with B group vitamins and allantoin, sebum-regulating
- **Allantoin:** Supports the natural regeneration of the skin

- Cleanses and clarifies blocked pores, inflammation abates faster
- Areas of unevenness are smoothed
- The horny layer's moisture content is improved
- The skin becomes perceptibly softer and has increased radiance
- Cell division is stimulated and skin renewal is accelerated
- Lines and creases are reduced
- Also leaves liver and pigmentation spots looking lighter

Bio-Fruit Gel Exfoliator

FRUIT ACID PEELING

The excessive accumulation of dead skin cells causes the surface of the skin to thicken and lose its natural sheen. Bio-Fruit Gel Exfoliator can be used to effectively dissolve and remove the uppermost skin cell layers. This is carried out in a particularly gentle manner without mechanical action.

Blemished skin with open and/or closed blackheads becomes clear again and inflammation is effectively combated. Due to the removal of the uppermost layers of skin, creases are visibly reduced, areas of unevenness are smoothed and liver and pigmentation spots are significantly and visibly reduced.

At 30%, the wholesale product is significantly more concentrated than the retail product, with 20%. This preparation therefore acts in the sense of a chemical peeling and must be used with extreme care.

Home care application

Bio-Fruit Gel Exfoliator is preferably to be applied after cleansing in the evening. To do this, generously distribute the preparation over the face and neck 2-3 times per week, leaving out the eye area. Allow to work in for approx. 5– 15 minutes. Massage briefly with moist fingertips and remove the surplus with a mask sponge and plenty of lukewarm water. Then apply a night care cream.

Tip: The 20% fruit acid concentration also enables effective but safe treatment at home.

Note: Any use of a peeling product causes the epidermis to become thinner and sensitizes it towards UV light. It is therefore vital to ensure adequate UV protection and apply Face Guard during the day. Only then apply the care cream on top as usual.

ACTIVE SUBSTANCES

- **Fruit acid complex:** Consisting of glycolic acid (sugar cane), malic, tartaric and citric acid; increases the cell renewal rate and improves the skin structure. Old, dead skin cells are loosened and are removed whilst new cells are able to grow without hindrance

JANSSEN COSMETICS

OILY SKIN

- Spots and pustules disappear faster, new ones are prevented
- Normalizes increased sebum production
- Soothes irritated, blemished skin
- Redness and blemishes are optically concealed

Home care application

After thoroughly cleansing the skin, gently dab Tinted Corrective Balm onto spots and pustules as often as possible and allow to work in. Then apply the relevant care product depending on the skin condition.

Tinted Corrective Balm

CONCEALING SPECIAL CARE

Not infrequently, the horny cells grow faster in the sebum glands' secretory ducts in the case of oily skin. This leads to the increased accumulation of horny cells. A horny plug forms, preventing the often increased sebum gland secretion (sebum) from flowing away.

Finally, this hornification disorder leads to the occurrence of both open and closed blackheads. In the event of a high incidence of bacteria or improper treatment, these become noticeable as inflammation in the form of pustules, papules and nodules.

Creamy Tinted Corrective Balm offers rapid aid to affected persons. Thanks to its skin-colored tinting, it makes blemishes invisible and perceptibly combats the emergence of blemishes. This is made possible thanks to the innovative anti-sebum active substance with oleanolic acid. This acts to reduce excessive sebum (sebosuppressive), remove surplus horny cells (keratolytic) and effectively combat bacteria (bactericidal).

As a "first aid measure", treatment should be carried out locally in good time at the slightest indication of blemishes. Spots often disappear again rapidly, and the occurrence of larger pustules is impressively prevented.

Test result

- Tested under specialist, dermatological supervision by the Dermatest® Institute
- Overall result: Very good
- Following 4 weeks of application, sebumetry determination using a sebumeter shows that the skin's lipid content is statistically reduced by 18.2%

ACTIVE SUBSTANCES

- **Anti-sebum active substance complex:** Contains an extract from olive leaves (oleanolic acid), reduces excessive sebum production, has a keratolytic and bactericidal effect
- **Aloe vera extract:** Soothing, skin-clarifying, moisturizing
- **Salicylic acid:** Opens the pores, removes dead skin cells on the surface, softens blackheads, antibacterial

- Refines the pore structure
- Inflammation abates faster, new inflammation is prevented
- Regulates the sebum gland function
- Blemishes are prevented
- Calming, balancing and moisturizing
- Leads to a clear and silky-matte skin profile

Clarifying Cream Gel

SEBUM FLOW-REGULATING CREAM GEL

Due to a seborrheic (oily-moist) skin condition, the sebum follicles are widened. The observer is confronted with the image of skin with enlarged pores, combined with a disturbing oily sheen and frequently accompanied by blackheads. If nodules and/or inflammation are present, these are generally referred to as papules and pustules. Not infrequently, the skin appears whitish-pale and is nevertheless relatively intransparent, as it is rather thick.

The skin's exterior appearance often leads to mental suffering for the afflicted persons. Within the field of care cosmetics, it is therefore desirable to prevent these characteristics of blemished skin, i.e. skin which is susceptible to acne, or to ensure that the symptoms abate as rapidly as possible. The natural equilibrium of the skin's function and its healthy bacterial flora should be restored in this case.

Clarifying Cream Gel is 24-hour care which is low in lipids and meets the above care requirements. The light texture refreshes in the manner of a hydro gel and simultaneously offers the care of a light cream.

When used daily, Clarifying Cream Gel effectively combats the causes of blemishes.

Home care application

Apply Clarifying Cream Gel onto cleansed skin in the morning and/or evening and massage in gently. Also suitable as a foundation for make-up.

ACTIVE SUBSTANCES

- **Butyl avocadate:** Distillate from the avocado fruit, anti-sebum active substance
- **Aloe vera extract:** Soothing, skin-clarifying, moisturizing
- **Red algae extract (Condrus crispus):** Moisturizing
- **Fine polyamide powder:** Porous, round spheres, microfine, absorb surplus sebum and leave the surface of the skin looking matte

Test result

- Tested under specialist, dermatological supervision by the Dermatest® Institute
- Overall result: Very good
- Following 4 weeks of application, sebumetry determination using a sebumeter shows that the skin's lipid content is statistically reduced by 18.2%

- **Dissolves dead skin cells**
- **Loosens stubborn blackheads until these are completely removed**
- **Antibacterial and anti-inflammatory**
- **Moisturizing**

Normalizing Skin Complex

ACTIVE SUBSTANCE CONCENTRATE FOR LOCAL APPLICATION

Stubborn blackheads, papules and pustules require special attention.

Firstly, the beautician providing treatment will professionally remove the corresponding blemishes following careful preparation with a peeling and steam bath, and secondly, the customer ensures that the blemishes abate gently by means of specific home care. The skin must be prevented from drying out under all circumstances. The natural equilibrium of the bacterial flora additionally has to be restored and skin renewal must be supported. Only in this manner can inflamed skin be relieved and further blemishes prevented.

Normalizing Skin Complex is a highly-dosed concentrate. It contains the innovative anti-sebum active substance with oleanolic acid, etc. Following application twice per day over a period of 6 weeks, clinical studies reveal an improvement in oily and blemished skin: sebum production decreases, and the number of blackheads and pustules is reduced, thereby lessening the tendency for inflammation to develop.

In combination with the corresponding care cream, problematic skin experiences rapid relief.

Home care application

Apply locally, i.e. directly onto oily areas of skin and existing or emerging skin blemishes as required, massage in gently and allow to work in for a few minutes. Then use Clarifying Cream Gel for further care.

Tip: Ideal for post-extraction treatment in the cubicle.

ACTIVE SUBSTANCES

- **Anti-sebum active substance complex:** Contains an extract from olive leaves (oleanolic acid), reduces excessive sebum production, has a keratolytic and bactericidal effect
- **Salicylic acid:** Opens the pores, removes dead skin cells on the surface, softens blackheads (keratolytic)

☰ Purifying Mask

SPECIAL DEEP CLEANSING MASK

Supplementary and particularly gentle cleansing of oily skin is carried out with Purifying Mask, a sebum-absorbing care mask.

Designed on the basis of healing earth, this mask is able to absorb the skin's surplus lipids in an extraordinarily gentle manner. The simultaneous release of innovative active substances soothes and effectively combats skin blemishes without drying out the skin. A clear and matte complexion soon becomes visible.

Each time it is applied, Purifying Mask thrills customers with its light, non-oily and creamy texture. It is used to care for all skin conditions involving increased sebum production.

Note: Clay is also known as healing earth. This refers to a powder which is obtained from loess deposits from the Ice Age (clay earth), see LUVOS healing earth.

Home care application

Apply Purifying Mask onto cleansed skin. Leave out the eye area. Allow to work in for up to 20 minutes. Remove with warm, moist compresses. Apply approx. 1-2 x weekly; if necessary, also more frequently locally on inflammation.

Tip: The mask naturally dries on. It can be removed more easily if it is first released gently with moist fingertips. Also ideal for local T-zone treatment for combination skin.

ACTIVE SUBSTANCES

- **Anti-sebum active substance complex:** Contains an extract from olive leaves (oleonic acid), reduces excessive sebum production, has a keratolytic and bactericidal effect
- **Aloe vera extract:** Soothing, skin-clarifying, moisturizing
- **Healing earth:** White china clay; sebum-absorbing effect
- **Fomes officinalis:** Larch agaric (tree fungus) extract, contains polysaccharides and minerals; natural astringent acts to perceptibly lift and refine the skin profile by reducing the size of pores

Test result

- Tested under specialist, dermatological supervision by the Dermatest® Institute
- Overall result: Very good
- Following 4 weeks of application, sebumetry determination using a sebumeter shows that the skin's lipid content is statistically reduced by 18.2%
