Lip Balm	2500	15 ml		

A person's skin condition is as individual as he himself is. This is precisely why successful cosmetic treatment should always commence with careful skin diagnosis. Skin needs, etc. which have nothing to do with the skin type are often discovered in this way. These correspond more to a skin condition which requires particular attention and thus special care products.

## ALL SKIN NEEDS

This is the name given to a range of products which meet the needs of all skin and are able to supplement daily care irrespective of a specific skin type.

## ALL SKIN NEEDS

- **Moisture-regulating**
- **For all skin types**
- **Sun protection which can be integrated to combat daily solar radiation stress**
- **With additional cell protection**
- **Ultra-light formulation, oil-free**
- **UVA protection measured according to the Boots Star Rating: 4 stars = superior**
- **UVB protection**

## ☰ Face Guard

### SUN PROTECTION CONCENTRATE WITH SPF 15 AND SPF 30

Reliable UVA and UVB protection can now be integrated into your daily care: Face Guard makes it possible. The oil-free lotion with SPF 15 or 30 contains photostable light filters to combat omnipresent UVA and UVB radiation, and is tolerated outstandingly even by sensitive skin.

The additional cell protectant, ectoin, has the special capability of inducing faster formation of so-called stress cells in the skin. This protects the skin's immune system and prevents light-related skin damage (creases, hyperpigmentation). Ectoin is also able to increase and bind the skin's moisture – even under extreme climatic conditions, e.g. dry heat in large cities.

Regardless of the skin type, the ultra-light formulation always enables additional light protection during the day. Skin type-specific care is undertaken by the usual day cream, which is simply applied on top of Face Guard.

### Home care application

Distribute Face Guard onto the skin after cleansing in the morning, and apply the usual day cream on top.

*Tip: Ideal as an invisible glove for avoiding so-called age spots: Simply distribute onto the backs of the hands and repeat application several times during the day.*

### ACTIVE SUBSTANCES

- **Inorganic UVB filter:** Micronized titanium dioxide; the minute particle size is not visible even when present in large quantities
- **Organic UVA/B broadband filter:** Photostable triazine derivative absorbs UVA and UVB radiation without being destroyed itself
- **Organic UVA filter:** Photostable UVA filter with minimal particle size and 3-fold effect: UV light is absorbed, scattered and additionally reflected
- **Ectoin:** Cell protection factor produced by microorganisms, active cell protection to combat heat and UV light, moisture-regulating

- **With UV protection**

## BB Cream

### 4-IN-1 FACIAL CARE FOR MEN AND WOMEN

#### LIGHT SPF 25 AND MEDIUM SPF 20

It does exist: the multi-tasker amongst creams! This genuine panacea is called BB Cream and combines make-up, concealer, sun protection and care to offer an incomparable product for both young and mature skin.

BB Cream impresses even on initial use, regardless of whether it is applied specifically or generously. Small blemishes, skin redness, shimmering veinlets and pigmentation spots are skillfully concealed. The skin is immediately left looking even and smooth. This regained freshness lends it a natural and healthy radiance.

However, BB Cream can do much more besides. Plant-based active substances fortify and protect the skin against oxidative influences and inhibit melanin formation in the long term. Pigmentation spots are not merely concealed - their occurrence is also nipped in the bud. The effective UV filter additionally protects the skin against harmful solar radiation. Oxidation and UV radiation are rendered harmless by an active substance from tomatoes.

BB Cream protects the skin against the visible signs of premature skin aging. When applied regularly, light-related liver spots no longer have any chance!

### Home care application

To protect and care, distribute BB Cream onto facial skin in the morning and massage in gently until the cream has formed a perfect "bond" with the skin. Gently conceal the transitions to the neck.

**Tip:** *Twice the amount offers even better hold! To increase coverage, simply apply BB Cream twice or use as a foundation for make-up.*

*Simply conceal areas of unevenness, rings around the eyes, red veinlets or pigmentation spots by specifically applying the cream onto them.*

### ACTIVE SUBSTANCES

- **Beta vulgaris maritima:** Wild beet extract for inhibiting melanin synthesis; the skin color retains its natural pigmentation
- **Lycopenes:** Tomato extract increases the volume of repair enzymes; external influences (oxidation and UV radiation) cause less damage; antioxidant
- **Wheat protein hydrolysate:** Promotes the skin's regeneration activity, boosts its native protection, alleviates skin irritation, softens
- **Aloe vera:** Soothing, skin-clarifying and moisture-boosting
- **Shea butter:** High-quality natural substance from the nuts of the shea butter tree (*Butyrospermum parkii*), protects the skin against drying out, lipid-replenishing, smoothing and softening
- **Vitamin E:** Antioxidant and radical scavenger
- **Titanium dioxide:** Physical UV filter

- Minimizes pores
- Reduces any oily sheen
- With UV protection

## CC Cream

### COLOR CORRECTIVE CREAM WITH SPF 30

Anti-aging requirements are constantly increasing. For JANSSEN COSMETICS, this is just one more reason to develop even more effective solutions and meet the desire for multifunctional skin care with anti-aging effect. The result is CC Cream with extra special care to meet demanding care requirements with minimum effort.

The new beauty expert smooths fine lines and wrinkles, corrects the skin tone and additionally offers protection against premature skin aging in just one step. In "Light" and "Medium" colors, CC Cream is also a perfect match for all skin types.

CC Cream combines selected active substances for effective results. The immediate effect for evenly beautiful skin with added freshness and radiance is particularly impressive. Soft pigments gently conceal skin irregularities whilst a skin-friendly mineral complex "pads out" lines and wrinkles. The skin becomes visibly smoother and pores appear finer. The skin looks fresher and years younger.

CC Cream also perfects the complexion in the long term. Plant-based active substances protect against dilated vessels and avoid red flecks on the skin. Even age spots appear significantly reduced. Extended pores are reduced in size and increased sebum production is normalized. The skin is left looking visibly more even. Skin-friendly UV filters maintain a healthy radiance and offer additional protection against premature skin aging.

CC Cream is as easy to use as a tinted day cream. When applied sparingly, it lends the skin a particularly natural radiance: even, smooth, with fewer wrinkles – flawlessly beautiful and youthfully vital!

### Home care application

To protect and care, distribute CC Cream "Light" or "Medium" over the facial skin in the morning and massage in gently. The cream blends perfectly into the skin. Gently stroke out the transitions on the hairline and neck.

**Tip:** For natural color results and even freshness, simply apply sparingly with a foundation brush and blend to achieve a perfect finish.

### Results of scientific studies

#### 1. \*Age spot corrector

Verification by means of in vitro study:

The difference in color between age spots and the surrounding, normal skin is reduced after just 2 months of regular application.

#### 2. \*\*Plant extract SORR

Verification by means of in vitro studies:

- Effect on melanin (brown flecks)
  - The melanin content decreases
  - The absorption of melanosomes into the keratinocytes is reduced
- Effect on hemoglobin (red flecks)
  - The vascular endothelial growth factor is weakened
  - Vascular sensitivity is reduced

### ACTIVE SUBSTANCES

- **Age spot corrector\***: Liposomally encapsulated extract of garden cress and liposomally encapsulated genistein (biologically active substance from the soya plant); verifiably brightens age spots
- **Plant extract SORR\*\***: Highly-active extract consisting of Siegesbeckia orientalis and Radosia rubescens; inhibits melanin absorption into the keratinocytes; acts to soothe and combat red flecks; promotes an even, radiant complexion
- **Fomes officinalis**: Larch agaric (tree fungus) extract; contains mineral salts; acts as a natural astringent; noticeably lifts and refines the skin profile by reducing the pores
- **Vitamin A palmitate**: Stable form of vitamin A; stimulates the formation of new epidermal cells; refines the skin's micro-complexion; reduces the depth and volume of wrinkles
- **Mineral complex**: Spherical structure for easy distribution; "pads out" fine lines and wrinkles; immediately achieves optical skin smoothing
- **Soft pigments**: For a flawless and balanced skin tone
- **UVA + UVB filters**: Reduce UV stress on the skin and protect against premature skin aging

## ALL SKIN NEEDS

2300

- **Speeds up the rebuilding of previously destroyed Stratum Granulosum**
- **Build up of skins physiological protection coat effectively**
- **Regenerating and tissue repair**
- **Acts soothing and calming on irritated skin**
- **Provides well desired cooling sensation**

## ■ Skin Resurfacing Balm

### CALMING HERBAL CREAM FOR POST-LASER TREATMENT

Skin Resurfacing techniques, e.g. high percentage Peels, Light therapy, Microdermabrasion and Laser Resurfacing will benefit from application of Skin Resurfacing Balm after the initial healing process has completed.

After Microdermabrasion, Light Therapy and Peels no downtime is expected and the product can be applied as protection and home care immediately.

While after Laser Resurfacing the skin needs to heal for several days. At the physicians advice Skin Resurfacing Balm can be applied, as soon as the healing process is finished.

The soft, fast penetrating cream provides a pleasant, cooling sensation for the irritated skin. The perfect aid as a 24-hour caring system which can be applied several times a day, as desired.

### Home care application

Apply Skin Resurfacing Balm onto treated skin as often as possible, at least morning and night.

### ACTIVE SUBSTANCES

- **Herbal extracts of:** Ruscus Aculeatus, Centella Asiatica, Calendula Officinalis, Horse Chestnut and Echinacea; for soothing, calming, strengthening
- **Bisabolol:** (derived from Chamomile) has anti-inflammatory effect
- **Farnesol:** for regeneration and anti-bactericidal benefits
- **Essential oil of Lavender:** natural perfume with harmonizing effect energizing, soothing, healing and stimulating. Stimulates cellular growth and regeneration
- **Panthenol (Pro-vitamin B5):** stimulates cellular proliferation and aids in tissue repair while acting as penetrating moisturizer. Provides keratinization and wound healing

## ALL SKIN NEEDS

RET.  
75 ml  
Ref.  
2400

- **The scar tissue will feel more elastic and softer**
- **Speeds up the building of connective tissue**
- **Restructures connective tissue replacement of the skin**
- **Smoother, regular skin by the touch**

### Home care application

First, cleanse and tone skin with appropriate cleanser and toner. Massage generous amount of Scar Cream onto treated scar tissue as often as necessary.

## Scar Cream

### HERBAL CREAM FOR SCAR TREATMENT

This herbal formulation will treat superficial skin lesions. The scars can appear after injury of the skin, e.g. Acne. Scar tissues is a replacement of connective tissue to close the skin wound. Scar tissue is different in building blocks and texture than the surrounding skin: Scar tissue has less elastic fibers (collagen) leading to shrinking and hardening of tissue. The scar can be pulled back inside when a wound does not heal the proper way. Often the development of connective tissues fibers is not enough. A deep lying scar appears, less circulated by blood while containing less tissue fluid.

For support it is advisable to apply Scar Cream after the healing process on the scar to keep the area soft and smooth.

Scar Cream is a pleasant 24 hour aid with a cooling sensation and can be applied as often as necessary.

Hint: Avoid sun light exposure, sauna and cold temperatures during the healing process in order to have the scar adapting to a similar texture as the healthy surrounding tissue.

### ACTIVE SUBSTANCES

- **Siegesbeckia Orientalis:** promotes the re-build of collagen fiber matrix
- **Vitamin C and E:** Synergistic effect to fight free radical damage, strengthens connective tissue by promoting collagen fiber build up and promotes healing of tissue damage as well as being anti-inflammatory effective
- **Mangifera Indica (Mango seed oil):** for smoother, softer skin
- **Octyldodecanol:** is an emollient to increase penetration of active ingredients and increases spreadability and skin-conditioning properties

## ALL SKIN NEEDS

- **Kind to contours**
- **Moisturizing**
- **Skin-smoothing**
- **Makes the skin supple**
- **Protecting**
- **Improves the lips' volume**

## ☰ Lip Balm

### RICH LIP CARE BALM

Velvety soft and naturally beautiful lips are not to be taken for granted.

The skin on the lips does not possess either sebum or sweat glands and is additionally very thin. No wonder that wind, low temperatures and dry, heated air at home and in the office cause unprotected lips to become chapped and brittle. A lack of moisture also causes the volume of the lips to decline – far in advance of the natural aging process, which is additionally accompanied by collagen breakdown. The lips become narrower and longitudinal creases outline their contours.

Lip Balm provides the sensitive skin on the lips with necessary protection and beneficial care. The natural oil content ensures a supple film and binds moisture. Velvety soft, the lips now follow each of the mouth's movements and take on an entirely new dimension.

A specially patented active substance consisting of peptides promotes full, soft lips. Based on the collagen- and elastin-stimulating peptide, the connective tissue becomes denser and the lips' volume increases.

When applied regularly, Lip Balm makes the mouth area naturally beautiful again thanks to its regained lip contour.

### Home care application

To protect and care, distribute Lip Balm over the soft skin on the lips several times per day and massage in gently.

**Tip:** *The lips are provided with special care when they are massaged using a soft toothbrush. Then generously apply Lip Balm over the lips and their contours, massage in gently and allow to work in over night. On awaking the following morning, your lips will be full, soft and perfect! Is your lipstick slightly dry? No problem! Simply add a small quantity of Lip Balm to instantly obtain tinted lip care with a velvety soft sheen.*

### ACTIVE SUBSTANCES

- **Palmitoyl oligopeptides:** Stimulate collagen synthesis, increase the lips' volume, smooth longitudinal creases, firm and define the lip contour, care for the skin on the lips, leaving it soft and supple
- **Shea butter:** High-quality natural substance from the nuts of the shea butter tree (*Butyrospermum parkii*), protects the skin against dehydration, lipid-replenishing, smoothing and softening
- **Macadamia nut oil:** Oil from the macadamia nut, rich in palmitoleic acid, smoothes lines and creases
- **Coconut oil:** Oil from the coconut, easily spread, leaves the skin feeling smooth and soft
- **Beeswax:** Protects and maintains suppleness

# SKIN APPLETS

**PROFESSIONAL SKIN CARE IN THE BEAUTY INSTITUTION**

**FOR ALL SKIN**

**TREATMENT SEQUENCE**

ALL SKIN NEEDS series products can be individually combined with all products for daily facial care. Of course, each individual product should only be applied onto cleansed skin.
