Olive Balancing	P-8366P	10 x 50 g
Goji Anti-Oxidant	P-8399P	10 x 50 g

PEEL OFF MASKS are high-quality powder masks which have been developed specifically for cosmetic treatment in the beauty salon. They are mixed with Ocean Mineral Activator and are immediately applied onto the face and neck, but also the neckline and e.g. hands, where they form something akin to a second skin and impress with their intensive effect:

Whilst the mask slowly hardens, moisture collects in the horny layer beneath the elastic mask film, which is impermeable to air and water. At the same time, the peel-off masks' active substances and additional active substances, e.g. from ampoules, are able to penetrate particularly well into the skin and intensively supply the substances it requires within a short space of time.

PEEL OFF MASKS can be optimally integrated into treatment sequences. However, they may also be offered separately as an individual treatment. In either case, the visible effect of treatment is astonishing. The application of just one mask leaves the skin noticeably smoother and more supple, and clearly refines the pore profile.

PEEL OFF MASKS are ideal for all customers who feel claustrophobic when hot modelage is applied.

PEEL OFF MASKS can be put to multi-functional use for facial and partial body treatments. Optimal treatment results are achieved if active substance concentrates (e.g. ampoules) are simply applied onto the skin beforehand and the mask is then applied on top.

Important note: please do not pour PEEL OFF MASK residues into the drain. Always allow mask residues to dry on and then dispose of them in the domestic refuse.

PEEL OFF MASKS

- **Increases the skin's moisture**
- **Models and relaxes the facial characteristics**
- **Acts to detoxify**

Application

1st step: Protect the customer's hairline (e.g. with paper tissues).

2nd step: Apply an active substance concentrate corresponding to the skin type onto the areas of skin to be treated and press in gently. Allow to work in for a few minutes.

3rd step: Mix the peel off mask. Quickly mix 30 g powder with approx. 90 ml Ocean Mineral Activator (room temperature) to form a smooth paste.

4th step: Evenly apply the thick mask mixture onto the face and neck or the corresponding areas of the body in upwards strokes using a spatula. Leave out the eyes and mouth (or include them after consulting the customer). Of course, the respiratory tracts always remain free. Allow the mask to work in for 15 - 20 minutes.

5th step: Simply peel the mask off and remove residues with moist mask sponges if necessary.

6th step: Then apply the appropriate care cream.

Note: when the mask hardens, powders residues may occur on the skin in areas in which the mask runs out. To avoid this, simply apply a little care cream along the edges of the mask at the transition to the neck, the hairline and the nostrils.

Tip: Spirulina Green Mask is also suitable for treating the hands and the back. Two to three 30 g portions of powder are required to treat the back, whilst one 30 g portion is sufficient for the backs of the hands.

■ Spirulina Green Mask

PEEL OFF MASK FOR ALL SKIN TYPES

Spirulina Green Mask is a multifunctional peel off mask in the sense of soft modelage. It is enriched with the active substance from the freshwater microalgae Spirulina. Spirulina is one of the oldest living beings still in existence today and is the absolute number one plant-based protein supplier. In addition to all of the essential amino acids, it has a protein content of approx. 65% and therefore provides the energy boost necessary for an improved metabolism. Selenium contents reduce the toxicity of many chemical pollutants which also make their presence known through changes in the skin profile's reactions.

The high chlorophyll content is reflected in the natural green coloring. According to the concept of color theory, this skin is able to absorb color vibrations and guide them into the body to balance out disharmonies at the energy level. Green therefore supports the Spirulina's high-quality contents in their overall effect of restoring, stabilizing and promoting the harmony of the skin's metabolism.

The skin-smoothing and elasticity-enhancing effect is revealed after just one application.

Spirulina Green Mask gently stimulates the metabolism thanks to its occlusive effect. Waste products and accumulated tissue fluid are rapidly transported away. Additional active substance concentrates which are used (e.g. ampoules) are transported into deeper layers of skin, and their effect is noticeably boosted. A significantly improved skin profile is rapidly achieved.

ACTIVE SUBSTANCES

- **Alginate:** Lends the powder mask an elastic, firm consistency after mixing and drying on (peel-off soft modelage), moisturizing, firming, lifting
- **Spirulina maxima (2%):** Microalgae and supplier of natural contents, i.e. protein, carbohydrates, vitamins, fatty acids and lipids, minerals and trace elements

Unlike the majority of marine algae, Spirulina contains virtually no iodine

PEEL OFF MASKS

- **Supports the skin's native regeneration process**
- **Models the facial characteristics**
- **Valuable source of vitamins**
- **Increases the skin's moisture**
- **Radiant complexion**

Application

1st step: Protect the customer's hairline (e.g. with paper tissues).

2nd step: Apply an active substance concentrate corresponding to the skin type onto the areas of skin to be treated and press in gently. Allow to work in for a few minutes.

3rd step: Mix the peel off mask. Quickly mix 30 g powder with approx. 90 ml Ocean Mineral Activator (room temperature) to form a smooth paste.

4th step: Evenly apply the thick mask mixture onto the face and neck or the corresponding areas of the body in upwards strokes using a spatula. Leave out the eyes and mouth (or include them after consulting the customer). Of course, the respiratory tracts always remain free. Allow the mask to work in for 15 - 20 minutes.

5th step: Simply peel the mask off and remove residues with moist mask sponges if necessary.

6th step: Then apply the appropriate care cream.

Note: when the mask hardens, powders residues may occur on the skin in areas in which the mask runs out. To avoid this, simply apply a little care cream along the edges of the mask at the transition to the neck, the hairline and the nostrils.

Acerola Vitamin C Powder Mask

PEEL OFF MASK FOR SKIN REGENERATION

Acerola Vitamin C Powder Mask vitalizes tired, lifeless skin and promotes its firmness with the fruit extracts from Acerola cherries.

Acerola is the fruit from a tree belonging to the Rosacea family. The Acerola cherry is particularly highly regarded due to its extremely high concentration of vitamin C. It additionally contains vitamins A and PP. This vitamin mixture protects skin requiring regeneration from the harmful effects of reactive oxygen molecules, what are called free radicals. Vitamin C additionally stimulates collagen synthesis and promotes lifted skin from the depths.

Thanks to the extensively hydrating properties of alginate, the skin is effectively moisturized. Valuable nutrients and vital substances are pumped into the skin and sustainably regenerate it.

ACTIVE SUBSTANCES

- **Alginate:** Lends the powder mask an elastic, firm consistency after mixing and drying on (peel-off soft modelage), moisturizing, firming, lifting
- **Sodium ascorbate:** Sodium salt of ascorbic acid (vitamin C), antioxidant, stimulates collagen synthesis
- **Acerola:** Fruit extract, particularly rich in vitamin C (17%) plus vitamins A and PP

PEEL OFF MASKS

- **Effective skin lightening**
- **Inhibits melanin synthesis**
- **Reduces existing pigmentation flecks**
- **Increases the skin's moisture**
- **Smooths and refines the skin's complexion**
- **Models the facial characteristics**

Botanica White Mask

PEEL OFF MASK FOR FAIR SKIN

Botanica White Mask is an alginate-based powder mask. It is enriched with the high-quality herbal complex consisting of mulberry root, grape, skullcap and saxifrage extract.

The paste-like consistency obtained after mixing the powder is transformed into an elastic surface film, referred to as soft modelage. It therefore offers a type of occlusive wrap and is simultaneously a carrier of plant-based active substance extracts which help to intensively lighten the skin. The enzyme activity responsible for producing melanin is extensively inhibited. At the same time, this also prevents the excessive formation of further native skin pigments. Ideal in the case of hyperpigmentation such as e.g. liver spots or chloasma, etc.

After being allowed to work in, the soft modelage can be removed in one piece as a peel-off mask; it does not leave any stubborn residues behind and is therefore particularly easy for the beautician to use in the beauty salon.

Application

1st step: Protect the customer's hairline (e.g. with paper tissues).

2nd step: Apply an active substance concentrate corresponding to the skin type onto the areas of skin to be treated and press in gently. Allow to work in for a few minutes.

3rd step: Mix the peel off mask. Quickly mix 30 g powder with approx. 90 ml Ocean Mineral Activator (room temperature) to form a smooth paste.

4th step: Evenly apply the thick mask mixture onto the face and neck or the corresponding areas of the body in upwards strokes using a spatula. Leave out the eyes and mouth (or include them after consulting the customer). Of course, the respiratory tracts always remain free. Allow the mask to work in for 15 - 20 minutes.

5th step: Simply peel the mask off and remove residues with moist mask sponges if necessary.

6th step: Then apply the appropriate care cream.

Note: when the mask hardens, powders residues may occur on the skin in areas in which the mask runs out. To avoid this, simply apply a little care cream along the edges of the mask at the transition to the neck, the hairline and the nostrils.

ACTIVE SUBSTANCES

- **Alginate:** Lends the powder mask an elastic, firm consistency after mixing and drying on (peel-off soft modelage), moisturizing, firming, lifting
- **Lightening herbal complex:** (Mulberry root-, grape, skullcap, saxifrage extract) Breaks down existing melanin, acts to lighten the skin, inhibits the formation of new melanin

PEEL OFF MASKS

- **Clarifies and refines the pore profile**
- **Regulates sebum gland activity, anti-inflammatory**
- **Absorbs surplus lipids to leave the skin velvety and matte**
- **Increases the skin's moisture**
- **Models the facial characteristics**
- **For all skin types which tend to develop blemishes**

Dead Sea Black Mask

PEEL OFF MASK FOR OILY, BLEMISHED SKIN

Dead Sea Black Mask is a peel off mask in the sense of soft modelage. It can be outstandingly integrated into facial and body treatments. The absorbent property of the alginate mask is optimally supported by the addition of active substances obtained from Dead Sea sediment. Those skin profiles which tend to reveal blemishes, increased sebum gland activity and extended pores particularly benefit from its skin-clarifying character. The addition of tea tree oil offers effective protection against further blemishes.

Supplementary active substance concentrates (such as e.g. ampoules) act even more intensively beneath the peel-off mask. All of the active contents effortlessly penetrate down to the deepest layers of the epidermis, where they intensify their effect. This effect is revealed after just one application in the form of regained elasticity and well-moisturized skin. Metabolic exchange as a whole is optimally stimulated thanks to the occlusive effect, whilst waste products and accumulated tissue fluid are transported away faster.

Oily, blemished skin is normalized and left looking radiant and fresh again. Balance is quickly restored to sebum gland activity and the appearance of the skin as a whole is vastly improved.

Application

1st step: Protect the customer's hairline (e.g. with paper tissues).

2nd step: Apply an active substance concentrate corresponding to the skin type onto the areas of skin to be treated and press in gently. Allow to work in for a few minutes.

3rd step: Mix the peel off mask. Quickly mix 30 g powder with approx. 90 ml Ocean Mineral Activator (room temperature) to form a smooth paste.

4th step: Evenly apply the thick mask mixture onto the face and neck or the corresponding areas of the body in upwards strokes using a spatula. Leave out the eyes and mouth (or include them after consulting the customer). Of course, the respiratory tracts always remain free. Allow the mask to work in for 15 - 20 minutes.

5th step: Simply peel the mask off and remove residues with moist mask sponges if necessary.

6th step: Then apply the appropriate care cream.

Note: when the mask hardens, powders residues may occur on the skin in areas in which the mask runs out. To avoid this, simply apply a little care cream along the edges of the mask at the transition to the neck, the hairline and the nostrils.

ACTIVE SUBSTANCES

- **Alginate:** Lends the powder mask an elastic, firm consistency after mixing and drying on (peel-off soft modelage), moisturizing, firming, lifting
- **Marine mud and salt obtained from the Dead Sea:** Rich in minerals and trace elements (zinc, magnesium, copper), fortifies and revitalizes the skin metabolism, calming, skin-clarifying and moisturizing
- **Tea tree oil:** Has an antibacterial and anti-inflammatory effect
- **Lemon oil:** Antibacterial, refreshing and harmonizing

PEEL OFF MASKS

- **Stabilizes the moisture content**
- **Lends the skin new vitality**
- **Supplies the skin with minerals and trace elements**
- **Revigorates the metabolism**
- **Improves the absorption of active substances**
- **Promotes a healthy complexion**

Ocean Minerals Hydrating

PEEL OFF MASK FOR DRY SKIN

Ocean Minerals Hydrating combines the power of the oceans in one mask. Maritime contents care for dry skin, leaving it smooth and supple.

No wonder, because all of the minerals which are important to the skin originate from naturally pure marine mud and energizing sea salt. Dry skin is beneficially and efficiently revived, and the skin's moisture content is stabilized in the long-term.

The skin's elasticity is increased after being treated just once with Ocean Minerals Hydrating. Fresh, rosy and well-moisturized, dry skin takes on new radiance.

ACTIVE SUBSTANCES

- **Glucose:** Grape sugar, moisturizer and mask basis
- **Alginate:** Lends the powder mask an elastic, firm consistency after mixing and drying on (peel-off soft modelage), moisturizing, firming, lifting
- **Marine mud:** Mineral-rich moisturizer
- **Sea salt:** Supplies the skin with important minerals

Application

1st step: Protect the customer's hairline (e.g. with paper tissues).

2nd step: Apply an active substance concentrate corresponding to the skin type onto the areas of skin to be treated and press in gently. Allow to work in for a few minutes.

3rd step: Mix the peel off mask. Quickly mix 50 g powder with approx. 60 ml Ocean Mineral Activator (room temperature) to form a smooth paste.

4th step: Evenly apply the thick mask mixture onto the face and neck or the corresponding areas of the body in upwards strokes using a spatula. Leave out the eyes and mouth (or include them after consulting the customer). Of course, the respiratory tracts always remain free. Allow the mask to work in for 15 - 20 minutes.

5th step: Simply peel the mask off and remove residues with moist mask sponges if necessary.

6th step: Then apply the appropriate care cream.

Note: when the mask hardens, powders residues may occur on the skin in areas in which the mask runs out. To avoid this, simply apply a little care cream along the edges of the mask at the transition to the neck, the hairline and the nostrils.

PEEL OFF MASKS

- Calms irritated skin
- Improves natural skin protection
- Increases the skin's moisture
- Smooth mask texture

Application

1st step: Protect the customer's hairline (e.g. with paper tissues).

2nd step: Apply an active substance concentrate corresponding to the skin type onto the areas of skin to be treated and press in gently. Allow to work in for a few minutes.

3rd step: Mix the peel off mask. Quickly mix 50 g powder with approx. 60 ml Ocean Mineral Activator (room temperature) to form a smooth paste.

4th step: Evenly apply the thick mask mixture onto the face and neck or the corresponding areas of the body in upwards strokes using a spatula. Leave out the eyes and mouth (or include them after consulting the customer). Of course, the respiratory tracts always remain free. Allow the mask to work in for 15 - 20 minutes.

5th step: Simply peel the mask off and remove residues with moist mask sponges if necessary.

6th step: Then apply the appropriate care cream.

Note: when the mask hardens, powders residues may occur on the skin in areas in which the mask runs out. To avoid this, simply apply a little care cream along the edges of the mask at the transition to the neck, the hairline and the nostrils.

Aloe De-Stress

PEEL OFF MASK FOR SENSITIVE SKIN

If the skin is sensitive, undesired skin reactions are never far away. It is now not only necessary to strengthen the skin's natural protection but also to sustainably calm it and alleviate skin irritation.

Aloe De-Stress can do both: strengthen and calm. This peel off mask's fast helpers are taken from nature. Aloe vera is a member of the lily family and has long since made a name for itself in terms of soothing sensitive skin. The cactus-like plant contains over 200 valuable, purely biological contents which impact positively on the skin's defenses and wound healing. Stressed skin is immediately calmed and supplied with a high quantity of moisture.

Spirulina platensis is able to keep pace with this. This unusual microalgae has been named due to its spiral shape and is regarded as an insider tip when natural concentrates which are rich in vital substances are required. Its high content of essential fatty acids, vitamins, minerals and trace elements is also beneficial to sensitive skin. The natural protective function is impressively strengthened.

The reactivity of sensitive skin is gently and reliably reduced.

ACTIVE SUBSTANCES

- **Glucose:** Grape sugar, moisturizer and mask basis
- **Alginate:** Lends the powder mask an elastic, firm consistency after mixing and drying on (peel-off soft modelage), moisturizing, firming, lifting
- **Aloe vera:** Skin-calming, moisturizing
- **Spirulina platensis:** Blue algae, rich in proteins, essential amino acids, minerals and vitamins; moisturizing and vitalizing

PEEL OFF MASKS

- **Normalizes dry and oily areas of skin**
- **Refines the pore profile**
- **Cares for the skin, leaving it soft and supple**
- **Skin-smoothing**
- **Particularly light, smooth mask texture**

Olive Balancing

PEEL OFF MASK FOR COMBINATION SKIN

The care of combination skin is always a challenge when dealing with the equilibrium of dry and oily areas of skin. Surplus lipids should be removed from the skin whilst the dry areas have to be supplied with caring active substances.

No problem for the Olive Balancing peel-off mask! The olive leaf extract and the rich olive oil lend the peel off mask a particularly beneficial effect and simultaneously supply valuable antioxidants. In addition, essential fatty acids preserve the natural moisture content of combination skin by enhancing its moisture binding capacity in the long-term.

The pore profile is refined whilst the mask is drying. The effect is clearly visible following each application. The combination skin is left looking significantly clearer and purer.

ACTIVE SUBSTANCES

- **Glucose:** Grape sugar, moisturizer and mask basis
- **Alginate:** Lends the powder mask an elastic, firm consistency after mixing and drying on (peel-off soft modelage), moisturizing, firming, lifting
- **Olive oil:** Cares for the skin with its high-quality fatty acid composition and leaves it supple and soft
- **Olive leaf extract:** Neutralizes cell-damaging free radicals
- **Oleocanthal:** Active substance from olives, anti-inflammatory, antioxidant

Application

1st step: Protect the customer's hairline (e.g. with paper tissues).

2nd step: Apply an active substance concentrate corresponding to the skin type onto the areas of skin to be treated and press in gently. Allow to work in for a few minutes.

3rd step: Mix the peel off mask. Quickly mix 50 g powder with approx. 60 ml Ocean Mineral Activator (room temperature) to form a smooth paste.

4th step: Evenly apply the thick mask mixture onto the face and neck or the corresponding areas of the body in upwards strokes using a spatula. Leave out the eyes and mouth (or include them after consulting the customer). Of course, the respiratory tracts always remain free. Allow the mask to work in for 15 - 20 minutes.

5th step: Simply peel the mask off and remove residues with moist mask sponges if necessary.

6th step: Then apply the appropriate care cream.

Note: when the mask hardens, powders residues may occur on the skin in areas in which the mask runs out. To avoid this, simply apply a little care cream along the edges of the mask at the transition to the neck, the hairline and the nostrils.

PEEL OFF MASKS

- **Antioxidant**
- **Radical scavenger**
- **Prevents light-related damage, e.g. due to UV light**
- **Improves the skin's natural protection function**

Application

1st step: Protect the customer's hairline (e.g. with paper tissues).

2nd step: Apply an active substance concentrate corresponding to the skin type onto the areas of skin to be treated and press in gently. Allow to work in for a few minutes.

3rd step: Mix the peel off mask. Quickly mix 50 g powder with approx. 60 ml Ocean Mineral Activator (room temperature) to form a smooth paste.

4th step: Evenly apply the thick mask mixture onto the face and neck or the corresponding areas of the body in upwards strokes using a spatula. Leave out the eyes and mouth (or include them after consulting the customer). Of course, the respiratory tracts always remain free. Allow the mask to work in for 15 - 20 minutes.

5th step: Simply peel the mask off and remove residues with moist mask sponges if necessary.

6th step: Then apply the appropriate care cream.

Note: when the mask hardens, powders residues may occur on the skin in areas in which the mask runs out. To avoid this, simply apply a little care cream along the edges of the mask at the transition to the neck, the hairline and the nostrils.

Goji Anti Oxidant

PEEL OFF MASK FOR DEMANDING SKIN

It has long been known that environmentally-related, aggressive oxygen compounds (free radicals) promote the premature aging process and also leave their mark on the skin. Uncomplicated skin is transformed far too quickly into demanding skin.

If the demanding skin is stressed, Goji Anti Oxidant offers a particularly beneficial effect. The concentrated extract of sea buckthorn and goji berries alleviates stressed skin and simultaneously promotes its natural protection.

In parts of Europe and Asia, precious sea buckthorn oil has long been used as a wound-healing substance to heal burns and combat acne, whilst the goji berries are well-known for their high vitamin C content.

Both contents are natural radical scavengers and support the antioxidant effect of vitamin C.

Treatment success is guaranteed with Goji Anti Oxidant. Every customer will be thrilled by her new, fresh and even complexion.

ACTIVE SUBSTANCES

- **Glucose:** Grape sugar, moisturizer and mask basis
- **Alginate:** Lends the powder mask an elastic, firm consistency after mixing and drying on (peel-off soft modelage), moisturizing, firming, lifting
- **Goji:** Berry extract, antioxidant
- **Sea buckthorn:** Berry extract, reinforces the skin's natural protection
- **Sodium ascorbate:** Sodium salt of ascorbic acid (vitamin C), antioxidant, stimulates collagen synthesis
